

At Power Efficiency Systems (PES), we specialize in optimizing energy efficiency through Power Factor Correction. Low Power Factor can drive up energy costs, reduce equipment lifespan, and cause safety risks. Our solutions lower your energy usage, cut costs, and reduce your carbon footprint, all while improving equipment performance.

Unveiling renewable energy innovations across continents In a world grappling with climate change and environmental concerns, the need for sustainable energy solutions has never been more pressing The Intersolar and The smarter E events... [Read more](#)

Power and Energy Solutions Africa is the proud representative of the leading global manufacturers of advanced battery technologies. Our partners include companies such as SAFT, Panasonic, GS-Yuasa and Tadiran batteries, amongst others.

Energy Resources leads the way in helping consumers reduce energy consumption and minimize environmental impact. We offer a comprehensive range of services, including energy audits and assessments, energy-saving measures and retrofits, energy management systems, renewable energy integration, and promoting behavioral and operational changes.

PES has for a number of years, been regarded as a leading trade publication across both the Solar/Photovoltaic and the global wind market, both onshore and offshore. Having been established in 2005 PES continues to deliver cutting-edge insight & technical analysis of the key issues & topics affecting the markets around the world, through its ...

A potential solution to Zimbabwe's energy issues could be harnessed from the country's growing interest in renewable energy systems (RES) for use in industry. Energy security, reduced reliance on fossil fuels, and promotion of sustainable industrial growth could be achieved by tapping into the nation's abundant renewable resources, which ...
