

What is a photovoltaic mounting system?

Photovoltaic mounting systems (also called solar module racking) are used to fix solar panels on surfaces like roofs, building facades, or the ground. [1] These mounting systems generally enable retrofitting of solar panels on roofs or as part of the structure of the building (called BIPV). [2]

Which roof hooks are suitable for a tiled roof?

SolarRoof has high-quality stainless steel roof hooks which are suitable for most types of tiled roofs. Side-mounted or landscape tile interfaces can be used to cater for special mounting needs. Roof hook extenders are also part of the range for installations on high corrugation tiles such as Spanish tiles

What makes solarroof a good roof hook?

Corrosion resistance is achieved through anodised structural grade aluminium and stainless steel components. The unique and innovative Z-module technology enables a surprisingly quick and easy installation. SolarRoof has high-quality stainless steel roof hooks which are suitable for most types of tiled roofs.

What is a building integrated photovoltaic (BIPV)?

It started feeding electricity to the National Grid in November 2005 Building-integrated photovoltaics (BIPV) are photovoltaic materials that are used to replace conventional building materials in parts of the building envelope such as the roof (tiles), skylights, or facades.
