

How to clean a solar panel?

When cleaning solar panels, it is particularly important not to damage them during cleaning. Cleaning with pure water is one of the safest, most effective and fastest methods in professional solar cleaning. Demineralized water is obtained by one of the UNGER filter systems by deionization or reverse osmosis.

How much does solar panel cleaning cost?

A professional solar panel cleaner has the necessary training and equipment to carry out this task safely for you. On average, cleaning solar panels normally costs around €9.50 per panel. You can use our request a quote feature to obtain quotes from local solar panel cleaning experts who come highly recommended in your area.

Do I need a professional solar panel cleaner?

Remember, if your solar panels are on the roof, we always recommend using the services of a professional solar panel cleaner. An expert solar panel cleaner will have the necessary training to safely shut down and restart the solar panel system before and after cleaning.

How often should solar panels be cleaned?

Generally, it is recommended to clean your solar panels at least twice a year. However, if you live in a particularly dusty area or experience frequent bird droppings, more frequent cleaning may be necessary. Delve into the best practices for solar panel cleaning, discover common mistakes, and read our step-by-step for cleaning your solar panels.

What is solar panel care?

Call our team now to discuss our solar panel care provision in greater detail. An integral part of your solar panel maintenance agreement is the routine inspection that keeps your system in good working order, identifying any damage or problems and putting solar panel system repairs into effect straight away.

When is the best time to clean solar panels?

The best time to clean solar panels is early morning or late evening during spring or summer, preferably on an overcast day. It's best to avoid cleaning the panels when they're hot from the sun. Make sure you turn the power off on the panels and the inverters before cleaning the panels. Check your solar panel instruction booklet for how to do this.

We also conclude that cleaning the PV panel strings after the sunset is more efficient than cleaning before the sunrise due to the dew drops on the panel on humid days. From our ...
