

Photovoltaic solar panels installed on the roof

Can you install solar panels on a roof in the UK?

The majority of UK homes have a roof suitable for solar panel installation. Great news for anyone looking to generate their own renewable electricity. If you'd like to speak to an MCS certified (or equivalent) solar installer for advice - you can get free no-obligation quotes from up to 4 solar installers in your area using Solar Guide.

What is a roof-mounted solar panel installation?

Roof-mount solar panel installations are less intrusive and invasive, and there is no need for extensive pre- and post-installation work or construction. Roof-mounted solar panels add aesthetic appeal and blend seamlessly with roofs, making them ideal for residential rooftop surfaces.

How to choose a solar roof?

Solar rooftop panels are installed using solar mounts. Identifying the area for solar panel installation helps determine how many solar mounts you need. Also, while identifying the total rooftop area, you can specify the extent of shade-free area. Ascertain the endurance capacity of the roof, as the solar panels are bound to weigh heavy on it.

Do solar panels generate electricity on a south-facing roof?

Solar panels generate most electricity when they're on a south-facing roof that's sloped at 41° and isn't shaded. It's one of the first things our surveyors look at when checking your home's right for solar. A good surveyor can talk you through how the panels' position on your roof will affect their performance.

Can you install solar panels on a flat roof?

The DNO is the company responsible for bringing electricity to your home. Usually, your installer will register the device for you. Yes, it's okay to install panels on flat roofs. Solar panels work best when angled towards the sun, so panels on flat roofs are normally tilted up to help maximise energy production.

What is a roof-mount solar system?

Here are a few considerations before putting your finger on one of them: A roof-mount solar system is a photovoltaic (PV) system that generates electricity through solar panels mounted on a rooftop.
