

Pmt wind power solutions Curaçao

How will a battery energy storage system benefit Curaçao?

The implementation of a Battery Energy Storage System will allow Curaçao to collect energy from renewable sources such as wind and solar energy and store it using advanced battery storage technologies. This stored energy can be released to mitigate the intermittency of wind power and ensure grid stability.

Does Aqualectra have a role in the energy transition in Curaçao?

Increasing capacity through wind energy is part of the Curaçao energy transition in which Aqualectra has a leading role. During the signing of the energy purchase agreement (Power Purchase Agreement), both the management of Aqualectra and NuCapital underlined the mutual trust and good cooperation between the two companies.

How much power will a new PPA produce in Curaçao?

The three parks jointly have a possible power production of 67.45 MW. Now that the new PPA has been signed, technicians from Aqualectra and NuCapital will start the preparatory work necessary to realize this immense project for the benefit of the energetic future of Curaçao. This project involves an investment of approximately US\$50 million.

Will Curaçao become a model for the region?

As soon as this Wind Farm starts producing electricity, Curaçao will position itself worldwide as the undeniable leader among the countries where 50% of their electricity production is generated by wind. This will put Curaçao at the forefront worldwide and our country will become a model for the region.
