

What percentage of electricity is produced in Portugal?

In 2019, electricity covered 25% of the total final energy demand, 56% of building energy demand, and 25% of industry energy demand, according to IEA. A significant portion of the electricity in Portugal is produced through a renewable source, over 50%. Wind power amounted to 24% of the electricity production.

Why does Portugal need fossil fuels?

This is mainly due to the lack of fossil energy sources, which continues to impact the total consumption of primary energy significantly. The main fossil fuels that account for the primary energy supply are oil, natural gas, and coal. It is estimated that Portugal's fossil fuel dependence by 2030 will be around 65%.

Does Portugal have a high level of electrification?

Portugal has a high level of electrification. In 2019, electricity covered 25% of the total final energy demand, 56% of building energy demand, and 25% of industry energy demand, according to IEA. A significant portion of the electricity in Portugal is produced through a renewable source, over 50%.

How can Portugal meet growing energy demands in a sustainable way?

Meanwhile, the rapid expansion of hydroelectric and solar energy capacity is helping Portugal meet growing energy demands in a sustainable way. These efforts align with European Union objectives, such as the RePowerEU plan and the Renewable Energy Directive, which targets 42.5% renewable energy in total consumption by 2030.

Does Portugal support solar energy?

Portugal has supported and increased the solar electricity (Photovoltaic power) and solar thermal energy (solar heating) during 2006-2010. Portugal was 9th in solar heating in the EU and 8th in solar power based on total volume in 2010.

How much energy does Portugal generate from renewables?

Portugal generated an 'historic' 95 per cent of its electricity from renewables in April, according to the network operator REN. Renewable energy generation averaged just below that for the first four months of the year, covering 91 per cent of the nation's power needs.

In 2013, 25.7% of the energy in Portugal was renewable, increasing to 27% in 2014 and 28% in 2016. By 2020, this number increased to around 30%. Portugal made worldwide news when in February 2016, 95% of ...
