

Pt alstom power energy systems Austria

Who makes Alstom generators and exciters?

Alstom was awarded a contract by Vorarlberger Illwerke AG for the supply of two generators and exciters for the Obervermuntwerk II pumped-storage power station in Austria. The generators have an output of 180 MW each and are specially designed for flexible use. Alstom is also responsible for the assembling and commissioning the machines.

Why is Alstom a good company?

Alstom is also successful in Austria with products for signalling technology and in the mainline railway sector. From equipping long-distance vehicles with the European Train Control System (ETCS) to Traxx locomotives, customers rely on Alstom.

Why should GE choose Alstom Power?

By combining the strongest attributes of GE's power generation technologies, services and expertise with Alstom Power's technology and geography, the global utility sector will benefit from a world-class supplier of total power plant and life cycle solutions that can support equipment from multiple suppliers.

Is Alstom the world's first hydrogen fuel cell-powered passenger train?

French railway manufacturer Alstom is among the first railway manufacturers in the world to develop hydrogen fuel cell-powered passenger trains. Alstom has already introduced the world's first hydrogen fuel cell passenger train, called the Coradia iLint, in Germany, and Cummins supplied the fuel cells.

Why should you choose Alstom Austria?

Alstom Austria assumes responsibility for society, diversity and the environment and focuses on sustainability along the entire value chain. This corporate responsibility is a crucial part of every business decision. To underline our commitment to diversity and equality, we have signed the Diversity Charter (German: Charta der Vielfalt).

Why should you work at Alstom?

Alstom is dedicated to building a diverse and international working environment that reflects the future of the mobility industry, our customers, and the passengers who board our vehicles.
