

SAN JOSE, Calif., December 05, 2024 -- (BUSINESS WIRE)-- QuantumScape Corporation (NYSE: QS), a leader in solid-state lithium-metal battery technology, today announced that next-generation heat treatment equipment for its separator production process, Cobra, has been developed, delivered, installed and released for initial separator processing.

QuantumScape is on a mission to transform energy storage with solid-state lithium-metal battery technology. The company's next-generation batteries are designed to enable greater energy density, faster charging and enhanced safety to support the transition away from legacy energy sources toward a lower carbon future.

One year after initial deliveries of solid-state battery prototypesto its automotive partners,QuantumScape is receiving additional praise from PowerCo - the battery-centric subsidiary of Volkswagen Group - for the potential of its technology.

This milestone is the culmination of years of advanced R&D on QuantumScape's fast separator production process - the core innovation that will allow its battery technology to be manufactured at gigawatt-hour scale. The company is targeting Cobra integration into its cell production baseline in 2025.

QuantumScape's lithium-metal solid-state batteries will charge faster, go farther, last longer and operate more safely than today's EVs and gas-powered vehicles -- bringing us closer to that lower carbon future. Do you want to help build one of the most critical parts of the future energy economy?

According to the company, it has begun low-volume production of its initial B-sample cells, which will soon be sent to automotive partners for EV implementation testing. The decade-plus journey of QuantumScape (\$QS) and its quest to develop and scale energy-dense solid-state batteries reached another important milestone today.

2 ???· Discover the future of energy storage with solid state batteries! This article delves into their cutting-edge technology, highlighting benefits like extended lifespan, quick charging, and improved safety due to solid electrolytes. Learn about key components, enhanced performance, and major players like Toyota and QuantumScape driving this innovation. While challenges in ...

QuantumScape's newly-released results, based on testing of single layer battery cells, show its solid-state separators are capable of working at very high rates of power, enabling a 15-minute charge to 80% capacity, faster than either conventional battery or alternative solid-state approaches are capable of delivering.

SAN JOSE, Calif., December 05, 2024--QuantumScape Corporation (NYSE: QS), a leader in solid-state lithium-metal battery technology, today announced that next-generation heat treatment equipment ...

QuantumScape's solid-state battery is designed to enable up to 80% longer range compared to today's lithium-ion batteries. Previous attempts to create a solid-state separator capable of working with lithium metal at high rates of power generally required compromising other aspects of the cell (cycle life, operating temperature, safety ...

QuantumScape continues to lead the charge (no pun intended) in providing the automotive industry with bonafide solid-state cells through scaled production that will enable EVs to one day drive ...
