

Will St Helena have a multi-fuel storage system?

The attached report investigates the historical and current issues faced by the ongoing project to construct an integrated multi-fuel storage system for St Helena, centred on a new bulk fuel installation (BFI) in upper Rupert's Valley that would hold diesel, petrol and aviation fuel (Jet A-1).

How does connect Saint Helena generate electricity?

At present approximately 75% of the islands electricity is generated from burning fossil fuel (diesel). We have 4 generators which have a total capacity of 5,400kW. Connect Saint Helena Ltd is committed to reducing reliance on diesel power generation by harnessing renewable energy sources.

Why does St Helena have less fuel tankers?

With fuel demand expected to increase due mainly to airport-enabled tourism, the limiting factor preventing St Helena from achieving economies of scale through larger, less frequent fuel tanker shipments was the volume of available ground fuel storage.

Who funded the St Helena Airport fuel system?

This system is an integral part of the contract awarded to Basil Read ('the contractor') to deliver the St Helena Airport Project. Full funding for the project, including the new fuel system, was provided by the UK Department for International Development ('the funder').
