

What does the Seychelles government do?

The Seychelles Government is committed to providing adequate, reliable and affordable energy to meet future energy consumption needs and to underpin strong economic growth through consumable energy initiatives. The Seychelles enjoy favourable conditions for renewable energy (RE) resources, such as wind and solar.

What is the Seychelles energy plan?

It targets an ambitious transformation and diversification of the Seychelles' currently 85 MW diesel-dominated electricity generation capacity (on Mahé, Praslin and La Digue), aiming at replacing diesel generators with domestic and international public and private financing.

What is the 'baseline scenario' for energy in Seychelles?

So far, the "baseline scenario" for energy in Seychelles is of slow, incremental addition of RE production, that will likely meet the modest 5% RE by 2020 but will struggle to meet the 15% by 2030 target without substantial changes to overcome technical, institutional, regulatory and financial barriers.

How much does Seychelles contribute to global emissions?

With approximately 0.003% of the world's GHG emissions in 2011, Seychelles contributes only marginally to the global emissions on an absolute scale (GoS, 2015). However, in particular the energy sector is carbon intensive. About 90% of all domestic CO<sub>2</sub> emissions stem from power generation and the road transportation sector.

What is a 100% renewable Seychelles?

A 100% renewable Seychelles - A plan to change the Seychelles' power supply to 100% renewables, its costs and possible benefits. Centre for Sustainable Energy Systems (CSES/ZNES), System Integration Department. Report 1: Mahé, and Report 2: Praslin and La Digue. International Monetary Fund (IMF). (2017a).

Is biomass a source of electricity in Seychelles?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Seychelles: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.
