

Does Sierra Leone need a reliable energy supply?

The nationwide electrification rate was recorded at 5% (estimated at 12% in urban areas and 2% in rural areas) in 2018 with roughly 150,000 connected customers. The country's energy needs are hugely under served, and the lack of a reliable energy supply is the primary obstacle to Sierra Leone's development.

How can the energy sector improve in Sierra Leone?

For the energy sector in Sierra Leone to improve and meet these targets at the rate required, some transformative changes are needed. Robust and resilient solutions, acceptable to a range of different stakeholders, are needed across the energy sector.

How do actors influence decision-making in Sierra Leone's energy sector?

Actors with knowledge and influence in Sierra Leone's energy sector are identified. Interviews with 30 identified core stakeholders in 16 face-to-face interviews. Decision-making in the electricity sector is influenced by varying actors' interests. Study finds a need to define key roles and improve communication and decision-making.

What is the current state of energy in Sierra Leone?

The current state of Sierra Leone's energy sector is in acute need of improvement: 80% of Sierra Leoneans do not have access to electricity [1]. Of those that have access, 17% are connected to the grid and another 2-3% are connected to solar, mini-grid or portable home energy systems [ibid].

Could wind energy be a viable option in Sierra Leone?

There is some indication that wind speeds of 12 m/s are possible in parts of the country, implying that wind energy could be a viable option in selected locations. Currently, Sierra Leone has one wind energy system of 5 kW located in the Bonthe District, along the southern coastline.

Are all stakeholders relevant to decision-making in the energy sector in Sierra Leone?

Research limitations The stakeholders interviewed as part of this study may not represent all stakeholders relevant to decision-making in the energy sector in Sierra Leone. This paper used an initial list of key stakeholders to inform the wider roster of actors deemed relevant stakeholders for inclusion (snowball sampling).

The Energy Policy for Sierra Leone (CEMMATS Group Ltd, with ECA Funding, December 2004); Energy Sector Strategy (Ministry of Energy and Power, March 2007); Statement of Energy Sector Policy and Strategic Plan for the Electricity Sub-Sector (Ministry of Energy and Water Resources, December 2008) 3. 5.

Washington, D.C. - In a historic move to boost Sierra Leone's energy sector, the Government of Sierra Leone and the U.S. Millennium Challenge Corporation (MCC) signed a \$480 million Energy Compact on Friday.

Power can be supplied to wholesale customers via our own local micro-grid or by "wheeling" via the national grid. The company has constructed and commissioned 40 towers and 10km of high-voltage line to connect to the national grid and installed more than 200 km of local micro-grid.

Vienna, Austria: EM-ONE, a technology and engineering firm, wins SEforAll contract to provide affordable, reliable, and sustainable energy to six hospitals in Sierra Leone. The project is funded by the UK's Foreign Commonwealth & Development Office (FCDO). Project details: EM-ONE was contracted to complete the engineering, procurement, and construction ...

Sierra Leone is suffering from a persistent electricity gap that has crippled its economic growth and prevented it from attaining several health and education development goals. This persistent electricity gap has generated significant interest in tackling the country's long-lasting energy deficiency. Providing electricity in a reliable, sustainable, and cost-effective ...

The Government of Sierra Leone is also seeking infrastructure investment to support expansion of energy distribution and transmission networks. Sierra Leone has good access to natural resources necessary for energy production such as access to viable wind speeds and sunshine for renewable wind and solar projects.

3 ???· A transformative \$1 billion investment by the United States Government is set to reshape Sierra Leone's economic and infrastructure landscape over the next five years. The initiative, which forms part of President Julius Maada Bio's Medium-Term National Development Plan, promises to deliver significant improvements in energy, job creation, and economic ...

Wind Energy. Sierra Leone's best wind velocities indicate a country-wide average of between 3 m/s and 5 m/s, increasing to approximately 8 m/s in some mountainous areas (Metrological Statistics, 2012). There is some indication that wind speeds of 12 m/s are possible in parts of the country, implying that wind energy could be a viable option in ...

IRENA, Sierra Leone Energy Profile (2022) Looking at the law It is clear that delivering a reliable and accessible power supply is a key political driver in Sierra Leone. Domestically, Sierra Leone does not have sufficient financial resources to harness its renewable energy potential. To achieve its ambitions, Sierra Leone will therefore

In general, the Sierra Leone energy sector (power) is small compared to other nations with AV power output less than 150MW of operational capacity for the whole country, and it is accessible mainly in Freetown.

According to recent statistics, it estimates that [37], barely 10% to 12% of the urban population and only around 2% of the rural ...
