

Does Sierra Leone need a reliable energy supply?

The nationwide electrification rate was recorded at 5% (estimated at 12% in urban areas and 2% in rural areas) in 2018 with roughly 150,000 connected customers. The country's energy needs are hugely under served, and the lack of a reliable energy supply is the primary obstacle to Sierra Leone's development.

Does Sierra Leone need rural electrification?

There is currently no entity in Sierra Leone with a specific mandate to drive rural electrification in the country. This is being run by various departments in the Ministry of Energy and SLEWRC. The 2018-2030 plan, however, has set plans for the formation of a Rural and Peri-Urban Electrification Authority.

Does Sierra Leone have a wind energy system?

Currently, Sierra Leone has one wind energy system of 5 kW located in the Bonthe District, along the southern coastline. Sierra Leone is one of the countries in sub-Saharan Africa whose progress in off-grid electrification has been relatively slow.

How much electricity does Sierra Leone have?

As of March 2019, the installed electricity generation capacity in Sierra Leone was 113 MW. This is made up of 75 MW of hydropower, 4 MW of solar and 34 MW of bioenergy. The nationwide electrification rate was recorded at 5% (estimated at 12% in urban areas and 2% in rural areas) in 2018 with roughly 150,000 connected customers.

What is the largest mini grid project in Sierra Leone?

Currently the largest active mini grid project in Sierra Leone. A \$34 million programme funded by DFID and implemented by UNOPS in partnership with the Ministry of Energy of Sierra Leone. The project aims to develop off-grid electrification projects to rural communities in the country.

Why is solar power costly in Sierra Leone?

Solar power is delivered at a very high cost in Sierra Leone, despite the country having an estimated hydro project potential of more than 1000 MW and abundant sunlight for solar power generation, with opportunities above 240 MW.

London/Dubai, 30th November 2023 - Octopus Energy's generation arm has entered into a milestone partnership with Idris Elba and Siaka Stevens' development company, Sherbro Alliance Partners (SAP), to build Sierra Leone's first wind farm as part of the Sherbro Island City project.. Announced at COP28, the collaboration and project will help accelerate the country's ...

What are the key investment opportunities within Sierra Leone's energy value chain? We have recently made a discovery with a small-to-medium upstream company and are looking for companies willing to develop that

to ...

"Our ambitious energy plan will help us create wealth and provide access to renewable and sustainable energy for all," said President Bio at the event dubbed: "National Dialogue on Just Energy Transition, Climate ...

Sierra Leone is seeking to create one gigawatt (1GW) energy generation capacity over the next 10-15 years. This plan includes implementation of a comprehensive energy sector reforms to provide the enabling environment to achieve at least 300 megawatts of new generation capacity by 2028, including a significant share of renewable energy to help ...

CO₂ emissions are dominated by the burning of fossil fuels for energy production, and industrial production of materials such as cement.. What is the contribution of each fuel source to the country's CO₂ emissions?. This interactive chart shows the breakdown of annual CO₂ emissions by source: either coal, oil, gas, cement production or gas flaring. This breakdown is strongly ...

Goal 7 Targets. 7.1 By 2030, ensure universal access to affordable, reliable and modern energy services. 7.2 By 2030, increase substantially the share of renewable energy in the global energy mix. 7.3 By 2030, double the global rate of improvement in energy efficiency. 7.A By 2030, enhance international cooperation to facilitate access to clean energy research and ...

The Government of Sierra Leone is also seeking infrastructure investment to support expansion of energy distribution and transmission networks. Sierra Leone has good access to natural resources necessary for energy production such as access to viable wind speeds and sunshine for renewable wind and solar projects.

Sierra Leone: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...
