

The Smart Energy Code (SEC) was first designated on 23 September 2013 following the granting of the DCC Licence. The latest version of the Consolidated SEC is available to download [here](#). For a more user-friendly version of the SEC, please see [The Digital SEC](#).

With the upcoming reintegration of the BESS and solar farms by December, Niue is poised to move closer to its goal of 80% renewable energy production by the end of 2025. The Ministry now has both old and new power stations available to ensure consistent energy delivery to all communities.

SMART ENERGY CODE COMPANY LIMITED CHAIRMAN'S STATEMENT This Annual Report covers the period April 2021 to March 2022, a year in which a dramatic increase in wholesale energy prices, in addition to COVID-19 restrictions, continued to present sizeable challenges to ...

Abstract: The Smart Energy Code is at the heart of smart metering . Effective governance is fundamental to the success of the Programme . The SEC will evolve e.g. data privacy, increasing the interplay with other requirements . Balancing commercial and regulatory burdens will challenge Parties .

The Smart Energy Code (SEC) is a multi-Party agreement which defines the rights and obligations of energy suppliers, network operators and other relevant parties involved in the end to end management of smart metering in Great Britain.

It enables you to search across multiple code documents, at the same time in one place. You can also filter code content to see the obligations that are relevant to your Party type. The platform enables better collaboration on consultations by giving you a single place to leave your views and inputs through a simple interface, saving you time ...

The Smart Energy Code Company Ltd (SECCo) is a corporate entity established to support the SEC Panel in carrying out its responsibilities. The Board makes decisions on funding allocation and supplier contracts, based on recommendations from the SEC Panel.

The Smart Energy Code (SEC) defines the rights and obligations of the DCC, energy suppliers, network operators and other relevant parties involved in the end to end management of smart metering in Great Britain. The SEC comes into force under the Data and Communications Company (DCC) Licence
