

Will IPPs build solar power plants in Ivory Coast?

The selected IPPs will build solar power plants capable of delivering 60 MWp to the national grid in Ivory Coast. The solar plants are being built under the "Scaling Solar" program, an IFC initiative to leverage public-private partnerships (PPPs) for the rapid construction of solar power plants in developing countries, particularly in Africa.

Which companies are developing solar power plants in Ivory Coast?

The Egyptian company Elsewedy Electric is also among the potential developers of the Laboa and Touba solar plants. The same goes for Infinity Power Holding and Nareva Holding, the subsidiary of the Moroccan group Al Mada. The selected IPPs will build solar power plants capable of delivering 60 MWp to the national grid in Ivory Coast.

How much solar energy is produced in Côte d'Ivoire?

Most recently, under the World Bank Group's Scaling Solar Initiative, IFC is supporting the development of two public-private partnerships to generate 60 MW of solar energy. Today, private operators in Côte d'Ivoire are currently responsible for 70% of energy production and 100% of its distribution.

How will IFC help Côte d'Ivoire develop solar power?

IFC, a member of the World Bank Group, signed the agreement with the Government of Côte d'Ivoire to help the country, one of West Africa's largest economies, develop 60 megawatts of grid-connected solar power through two public-private partnership (PPP) projects, which will power thousands of homes and businesses in the country.

Does Côte d'Ivoire need solar power?

Washington D.C., November 15, 2019 - The World Bank Group, through its Scaling Solar program, and the Government of Côte d'Ivoire have signed an agreement to help Côte d'Ivoire develop its supply of affordable, reliable clean energy and reach its goal of generating at least 42 percent of its power from renewable sources by 2030.

How will Scaling Solar help Côte d'Ivoire?

Under the agreement with Côte d'Ivoire, Scaling Solar will support the development, tendering, and financing of two utility projects in the country, which has West Africa's third largest electrical system with an installed generation capacity of 2,200 megawatts (MW).

Ivory Coast inaugurates its first solar power plant in Boundiali, marking a shift towards renewable energy. The project aims to reduce reliance on fossil fuels and double its capacity to 80 MWp by 2024. It employs 350 locals and serves as a model for sustainable development in the region. Ivory Coast celebrates a milestone with the inauguration of its first ...
