

Solar panel store in France

Are solar panels a good option in France?

More and more companies are either selling, or installing, solar panels for people across France. This, coupled with rising energy costs, continues to make solar panels appear an attractive alternative to gas or electric energy sources, for both homeowners and businesses. Here we answer eight common queries about solar panel installation in France.

How many solar panels are installed in France?

Solar panel installations are increasing in France with the last year seeing over 200,000 installations across the country as prices fell. This includes installations from both professionals and from DIY kits, which allow homeowners to set up the panels by themselves. Read more: Why record numbers of homeowners in France are installing solar panels

How much does a DIY solar panel cost in France?

The average price for a DIY kit including 16 panels is around EUR6,250. These are generally capable of producing 64,000Wh (watt cr#234;te, or 6.4 kWh), which is about 1.5x the power consumption of an average household in France.

What are the different types of solar panels in France?

The most common type of solar panel in France is the "photovoltaic solar panel" or PV (Panneau solaire photovolta#239;que). These are typically fixed to the roof of the home, and they operate by using photovoltaic cells to generate an electric current when hit by the sun's rays. Within the PV type of solar panel, there are three sub-types in France:

Can I add solar panels to my French home?

If you want to add solar panels to your French home, you are likely eligible for some form of state aid. The first type of state aid you might consider is the "MaPrimeRenov" which is a government sponsored program to make homes more energy efficient in an effort to decrease emissions.
