

Solar panels on industrial buildings United Kingdom

The demand for commercial solar panels is growing in the UK as industrial property owners recognise the myriad benefits associated with solar panel systems, including long-term cost savings and reduced maintenance costs.

Western Industrial is a leader in successfully executing large-scale projects involving solar panels on commercial buildings. With our extensive expertise and meticulous planning, we guarantee the seamless achievement of your solar panel project.

Wattage refers to the power output capability of a solar panel. Commercial solar panels typically have higher wattage than residential panels because they need to meet larger energy demands. The wattage of each panel can range widely, but commercial panels are often found in the range of 300 to 400 watts per panel.

Installing solar panels on commercial buildings in the UK is a financially smart and environmentally friendly decision. Businesses can take advantage of various grants and funding schemes to support the installation of solar panels, helping to offset initial costs and improve energy efficiency.

The SolarEdge solution for industrial buildings, includes PV harvesting on the roof or above outdoor parking lots, EV charging, energy storage and energy optimisation-- all from a single vendor, to maximise efficiency. [Learn more](#)
