We take care of all the paperwork and approvals required for solar installations. Contact us today for a free calculation or project for your solar system.

How can I generate my own electricity in Spain?

Generate your own electricity in Spain with solar power. A solar panel installation provides a fantastic return on investment and, with the savings you will make on your electricity bill, your solar panels will pay for themselves in just a few years! At Mariposa Energía we take care of the whole process for you.

Who is solar in Spain?

Solar in Spain has been active in renewable energy since 1999. So far, we have successfully completed over 3,000 projects and we have developed a really strong combination of experience and knowledge in the sector. As a company, we are totally dedicated to renewable energy.

Which latitude is best for solar panels in Spain?

Spain lies between 36° and 43° north latitude. This affects the efficiency of solar panels. The closer to the equator, the more solar energy there is. That's why we adjust the tilt and orientation of the panels to suit the location.

Why should you choose solar power in Spain?

This means that Spain has more potential to generate solar power and save on electricity bills. We also take into account the number of sunny days in your particular city, as this affects the reliability and consistency of solar power.
