Tajikistan's goal is to reach energy independency, and the main prospects for the country's energy sector, which relies on energy imports during the long heating periods, are: higher exploitations ...

Fayziddin Sattor Qahhorzoda, Minister of Finance of Tajikistan said: "The Rogun Hydropower Plant plays a crucial role in Tajikistan's growth and the region's shift towards green energy. It tackles power shortages and expands renewable energy access in rural areas, establishing Tajikistan as a prominent contributor to clean energy exports.

Tajikistan is an upstream riparian state largely depending on hydropower energy produced in big reservoirs and smaller run-off-river dams. Uzbekistan is downstream riparian state rich in carbon ...

Tajikistan's climate is continental with seasonal variations. It has hot summers and mild winters and a semiarid to polar climate in Pamir Mountains. The average low and high temperatures are 8.1°C and 22.0 °C, respectively. 2.9% of the land in Tajikistan is covered by forest.
