What is BMZ Hyperion?

The BMZ Hyperion sets a groundbreaking standard in the energy storage industry. With its advanced high-voltage technology, the system not only delivers impressive performance but also boasts a high adaptability to diverse requirements. Developed in close collaboration with inverter manufacturers, BMZ Group offers all-in-one solutions.

Why is BMZ Hyperion a good choice?

The Hyperion's modular design enables flexible scalability, making it the optimal choice for both residential and commercial applications. Its focus on efficiency, reliability, and adaptability positions the BMZ Hyperion as a forward-thinking solution for sustainable energy supply.

How many Helios modules can a Hyperion have?

The "Made in Germany" product can be equipped with a minimum of three and a maximum of six helios modules with a total capacity of up to 18 kWh. High quality lithium-ion battery cells are built into the Hyperion. The safe design and the robust construction follow the proven BMZ quality of the previous storage families.

BMZ Hyperion LONG LIFE (12.6 kWh): This high-voltage lithium-ion storage system impresses with a service life of 20 years and over 10,000 charging cycles. The robust metal construction makes it particularly durable and safe.

The Hyperion Long Life has been specifically designed to meet the demanding requirements of industrial applications. With its exceptional lifetime, high capacity and maximum efficiency, this energy storage system offers unparalleled performance for your business needs.

The BMZ Group have launched one of the world's first high-voltage storage system called Hyperion. The new innovative Hyperion high-voltage storage system is modular in design and allows easy and reliable installation as well as future expansion of the storage system if higher energy volumes become necessary.
