

TÄ¼rkiye bluepalm powerstation

How do I charge my bluepalm power station?

Flexibility when charging your Bluepalm power station. The Power Station has three charging options: mains power, car adapter and solar. The built-in controller supports solar inputs of up to 1,000 W (solar panel idle voltage range 12 V-60 V).

What is the difference between bluepalm & sales department?

The sales departments take care of selling the products to our customers at home and abroad. On the one hand, innovative products create improved service. On the other hand, BLUEPALM stands for BEST QUALITY AT THE BEST PRICE/PERFORMANCE RATIO and is thus intended to improve our everyday life.

What is the difference between bluepalm and innovative products?

On the one hand, innovative products create improved service. On the other hand, BLUEPALM stands for BEST QUALITY AT THE BEST PRICE/PERFORMANCE RATIO and is thus intended to improve our everyday life. Comprehensive quality control of every single BLUEPALM product ensures consistently high product quality.

With an impressive 1568Wh capacity and multiple outputs, the BLUEPALM Powerstation is the ideal emergency power generator and the ideal solution for outdoor use or power outages, so you don't have to worry about BLACKOUTs ...

To meet your needs on the go, the BLUEPALM power station is suitable for mobile phones, tablets, laptops, fans, CPAPs and much more. General: Model: BP-S1500F. Capacity: 1568 Wh. Battery type: LiFePO4. Single cell capacity: 30Ah@3.2V/pc. Life cycle: 4000+ cycles to 80% capacity. Display: APP / LED screen.

Flexibilität beim Aufladen ihrer BLUEPALM Powerstation. Die Power Station verfügt über drei Lademöglichkeiten: Netzstrom, Auto-Adapter und Solar. Der eingebaute Regler unterstützt Solareingänge von bis zu 1.000W (Solarmodul-Leerlaufspannungsbereich 12V-60V).

The Powerstation has a PV connection with an input power of up to 7000 watts. UPS mode. Uninterruptible power supply in case of emergency. In case of a power failure, the UPS mode reacts in less than 20 milliseconds and supplies power to devices such as alarm centres or servers so that no important data is lost. IP65 waterproof design

All operational coal-fired power stations over 50MW are listed below. Five plants were shut down at the end of 2019 to reduce air pollution, [1] leaving total installed capacity at about 17 GW, with 1.3 GW under construction. [2] However [3] government may continue subsidizing some of the most polluting plants in 2020. [4] [5] In 2019 almost 500 million lira was paid to them.
