

Türkiye solar financing

Why is the World Bank partnering with Türkiye?

The World Bank welcomes the commitment to double renewable energy by 2035 and is delighted to accompany the country in its efforts to achieve energy security, lower energy costs for consumers, and fight climate change with projects like the one we have just signed today," said Humberto Lopez, World Bank Country Director for Türkiye.

How will Türkiye improve energy security?

The government aims to significantly scale-up solar energy to 52.9 gigawatts (GW) by 2035 from 9.5 GW in 2022. The target for battery storage is 7.5 GW. With these and other clean energy measures, the government is boosting energy security as an integral part of efforts to decarbonize Türkiye's economy by 2053.

What is green finance in Turkey?

These payments can be assigned to the financial institutions directly, and therefore it can be considered as a collateral. The most common forms of green finance in Turkey have been green credit lines and loans issued by the Development Finance Institutions (DFIs).

Does Turkey have a green loan?

Akfen's green loan is Turkey's first 'green project finance' loan after the first green corporate loan agreement signed in Q1 2018. The World Bank does not have a solar financing facility of its own in Turkey; however it is a major player via direct finance (loans) or private equity, as in the Akfen example above.

Who is implementing a development program in Türkiye?

The program will be implemented by Türkiye's leading private and public development banks: the state-owned Development and Investment Bank of Türkiye (Türkiye Kalkınma ve Yatırım Bankası [TKYB]); and the privately-owned Industrial Development Bank of Türkiye (Türkiye Sanayi Kalkınma Bankası [TSKB]).

How do loans work in Turkey?

Loans are provided to final beneficiaries in cooperation with local private banks/leasing companies in Turkey. These three financing facilities differ from each other according to their target clients and size of projects. Until now, all the financing facilities have been managed and implemented by Stantec in Turkey.

Financing for Turkey's clean energy sector is expected to be in the region of \$2.5 billion this year with more than half channeled to solar projects, a banking official at Garanti BBVA told ...
