Why did Brill power raise \$10.5m in 2022?

Brill Power successfully achieved a Series A round raising of \$10.5m in 2022 to support their mission to make batteries smarter, cleaner, safer and longer-lasting as a critical element of the shift to zero emissions energy.

What is a BrillMS battery management system?

The BrillMS enables battery system developers to create the safest, most reliable battery systems while ensuring the lowest possible cost of ownership for their customers. Brill Power, an Oxford University spin-out company, has launched the first in a new class of 'intelligent' battery management systems (BMS).

What is the BrillMS B62 premium battery management system?

The BrillMS B62 Premium battery management system eschews the compromises inherent in the two existing categories of BMS. Until today, energy storage solutions relied upon either passive balancing or more costly active balancing options for batteries to operate safely and efficiently.

Summary Soft power is the ability to affect others to obtain the outcomes one wants through attraction and persuasion rather than coercion or payment. A country's soft power rests on its resources of culture, values and policies. A smart-power strategy combines hard- and soft-power resources. Public diplomacy has a long history as a means of promoting a ...

To compromise or not to compromise in battery technology. Damien Frost, CTO and Co-Founder of Brill Power, gets us up to speed with the challenges presented by large format cells, and how finding the way forward between compromise and innovation will lay the path for the future of the industry in this new contributed article published in Intercalation Station.

Brill Power is headquartered in Oxford, United Kingdom. What is the size of Brill Power? Brill Power has 43 total employees. What industry is Brill Power in? Brill Power's primary industry ...
