

Is Vert Energy Group a good company?

Vert Energy Group is a very professional organization. They are easy to work with, professional and service oriented. Regency Centers partnered with Vert Energy Group to manage energy benchmarking and disclosure across our entire portfolio.

How much energy does Israel use?

Most energy in Israel comes from fossil fuels. The country's total primary energy demand is significantly higher than its total primary energy production, relying heavily on imports to meet its energy needs. Total primary energy consumption was 304 TWh(1.037 quad) in 2016, or 26.2 million tonne of oil equivalent.

How important are Israel's natural gas discoveries?

The discoveries of the Tamar gas field in 2009 and the Leviathan gas field in 2010 off the coast of Israel were important. The natural gas reserves in these two fields (Leviathan has around 19 trillion cubic feet) could make Israel more energy secure.

How much natural gas does Israel produce?

Specifically, Israel produced 7 billion cubic meters of natural gas in 2013, and imported 720 million cubic meters in 2011. Historically, Israel has imported natural gas through the Arish-Ashkelon pipeline from Egypt. Egypt is the second-largest natural gas producer in North Africa.

How does the IEC regulate natural gas distribution in Israel?

The IEC has a natural gas distribution law which regulates the distribution of natural gas in Israel to empower market competition. The discoveries of the Tamar gas field in 2009 and the Leviathan gas field in 2010 off the coast of Israel were important.

Does Israel import natural gas from Egypt?

Historically, Israel has imported natural gas through the Arish-Ashkelon pipeline from Egypt. Egypt is the second-largest natural gas producer in North Africa. In 2005 Egypt signed a 2.5 billion-dollar deal to supply Israel with 57 billion cubic feet of gas per year for fifteen years.
