In some cases inverter problems mean you don't get any usable renewable electricity. It can also be a pricey problem to fix.

What should I do if my solar meter is faulty?

Contact your solar panel installer or a solar panel maintenance professional. If your generation meter is replaced, make sure you get a letter from the installer stating what they have done and that they changed the meter because it was faulty. The paperwork should also state the model and serial numbers of the old and new meters.

What should I do if I don't have solar system monitoring?

If you do not have solar system monitoring installed, the first step is to check for any obvious issues with the solar panels, such as a build-up of dirt, dust, mould, or leaves. Maybe a good wash with a soft broom and water is all that they need. Also, check no nearby trees have grown significantly and are shading the panels.

How can I avoid problems with solar panels?

The best thing you can do to avoid problems with solar panels is to ensure you work with a professional installation company to begin with. By working with DES Renewable Energy, you can ensure that your panels are positioned perfectly and that the installation is carried out professionally to reduce the risk of loose connections or damage.

What should I do if my solar panels don't work?

Checking for shade on your panels - trees and shrubs that grow and block the sun from your panels will affect the amount of electricity they produce. So it's good practice to prune them back. Keeping an eye out for birds or squirrels nesting under your panels. They can cause damage, as well as soiling your panels.
