

Does Greece need a smart meter?

Greece's target to shift from lignite towards renewable energy sources further propel such efforts. There is a lot of work to be done, given the lack of investment, which has led to a lack of smart meter penetration. Only 200,000 customers out of the 8 million being served by Greek grid operator HEDNO currently have smart meters.

Will Greece become a net exporter of energy?

There are multiple high profile electricity interconnector projects in discussion, with two aiming to connect Greece with Egypt for the purpose of exporting renewable energy into Greece and beyond. As Greece further develops these projects, it positions itself to become a net exporter of energy in the region.

How will Greece transform its energy sector in 2022?

In June 2022, Energy Minister Skrekas stated that 44 billion Euros would be dedicated to the structural transformation of Greece's energy sector which would include increasing renewable energy capacity to 25 GW from the current 9 GW and tripling the volume for LNG storage. The phaseout of lignite plants was delayed until 2028.

New detrital zircon geochronology from the Cycladic and Pelagonian terranes (Greece): implications for the Paleozoic paleo-reconstructions of peri-Gondwanan terranes accretion to Laurussia

Greece's role in energy security is more important than ever, argues State Department official Geoffrey Pyatt. Credit: US Embassy Kyiv, Ukraine / Public domain via Wikimedia Commons. The prospect of the Vertical Corridor gas pipeline puts Greece in a leading position in energy security, U.S. Assistant Secretary for Energy Resources and former U.S. ...

Through the use of the technology the smallholder farmers will save over 1,000 USD per year in energy cost, their crop yield will increase minimum by 30%. This solution is made available to the smallholder farmers through a rent-to-own installment payment plan.

AirEnergy was established in 2008 to focus on the energy transition towards a more sustainable future in Greece. The company's main business includes assessing, developing, constructing, consulting on and managing projects, as well as managing ...

Greece: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version.
Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
